

LEARNING MORE ABOUT AUSTRALIS!

ZOYSIA AUSTRALIS

Zoysia Australis is a tough and hardy, medium-textured zoysia grass with a beautiful blue/green leaf. It's a new zoysia variety that provides solutions for Aussie families with its ability to be installed in a wide range of areas. It can stand up to the stresses of a family and pets and has shade tolerance to thrive where other grasses falter.

Important Tips for Installation:

- Install the grass as soon as possible after delivery
- Lay on a bed of 50 to 100mm of quality turf underlay
- Roll to compact new turf to improve contact with the soil
- Soak the newly laid turf thoroughly for 10 to 14 days after installation or until fully established
- Reduce irrigation once established and water only when the grass appears dry
- Mow as soon as the grass has rooted in to promote lateral growth.
- Mowing height 10mm to unmown.
- Full sun to heavy shade (minimum 3-4 hours direct sunlight per day)

Zoysia Australis was bred by the world's best Dr Brian Schwartz bred Zoysia Australis at the world-famous University of Georgia, Tifton Campus. Dr Schwartz is renowned as the scientist behind the release of the highly successful TifTuf Hybrid Bermuda.

Important Tips for Fertilising:

- Apply Lawn Solutions Fertiliser at a rate of 10g/m² or 1kg/100m²
- Add nutrients in measured amounts and monitor growth and health of the grass before reapplying.

Important Tips for Irrigation:

- If watering is necessary once established, water only when there are signs of the grass dying out, as excess irrigation can hinder the grass rather than help
- Do not overwater in the cooler months
- If irrigation is needed, water deeply to soak the top 100mm of soil
- Water early morning for improved efficiency and plant health.
